Notes

Real Estate Tax

The total for Philadelphia includes the School District's Real Estate Tax revenue plus revenue collected with the Business Use and Occupancy tax which is levied on the use or occupancy of real estate

Earned Income Tax

Pittsburgh School District earned income taxes are not reported with the rest of the school districts. This figure is lumped with "Special Taxes for Pittsburgh and Philadelphia" in Table 4 of "Revenue Data and Equalized Mills for Pennsylvania School Districts, 1999-2000"

The Philadelphia School District may not tax earned income based on a court decision that determined that non-residents may not be forced to fund city schools. As the wage tax in Philadelphia extends to taxpayers who work but do not live in the city, the school district is precluded from taxing earned income. The City of Philadelphia, however, does levy a wage tax and makes up for the school districts inability to do so by appropriating money to the school district from the city general fund on an annual basis. For the purposes of this report, that amount -- \$15 million in 1999-2000 -- is counted as earned income for the Philadelphia School District.

"Net Profits" include S Corporation, Partnership, LLC and Sole Proprietorship income. Partnership, LLC and Sole Proprietorship income is liable for the school district earned income tax, S Corporation income, however, is not. It is not possible to isolate S corporation income from the Net Profits total, therefore, the calculation of earned income tax from net profits results in higher revenue than is accurate. The results will be off by differing degrees in each school district because S corporation income as a percent of net profits varies from district to district.
